

WHAT IS CLAIMED IS:

1. A memory card drive comprising:
a memory card drive body having a memory interface;
a plurality of memory card slots provided in said
memory card drive body; and
a plurality of memory cards, detachably accommodated in
said memory card slots, into and from which digital
information is recorded and played back through the memory
interface.
2. A memory card drive according to claim 1, wherein
said memory card slots are provided in a memory card tray
that is loaded into and unloaded from said memory card drive
body.
3. A portable memory card drive comprising:
a portable memory card drive body having a memory
interface;
a plurality of memory card slots provided in said
portable memory card drive body; and
a plurality of memory cards, detachably accommodated in
said memory card slots, into and from which digital
information is recorded and played back through the memory
interface.

4. A portable memory card drive according to claim 3, wherein said portable memory card drive body includes a power supply.

5. A portable memory card drive according to claim 3, wherein said memory card slots are provided in a memory card tray that is loaded into and unloaded from said portable memory card drive body.

6. A portable memory card drive according to claim 3, further comprising an opening/closing cover pivotally attached to said portable memory card drive body for movement between an open position, in which the memory cards are exposed, and a closed position, in which said opening/closing cover covers the memory cards.

7. A portable memory card drive according to claim 4, wherein the power supply is at least one battery that is included in said portable memory card drive body.

8. A portable memory card drive according to claim 4, wherein the power supply is a battery pack that is detachably attached to said portable memory card drive body.
